ARRIFLEX® 35

now also available with

VARIABLE SHUTTER

Here's Important News for cinematographers who need adjustable shutter speeds for special applications — particularly for Sports, Missile and Instrumentation work.

The variable shutter of the new ARRIFLEX 35 IIBV can be closed down to 0 degrees! This secondary shutter is located behind the mirror reflex shutter; it is calibrated in degrees and can be observed through the taking lens opening when the lens is removed. The segments of this shutter can be adjusted in relation to the mirror reflex shutter by depressing and turning the knurled knob (see arrow) at the side of the Arriflex camera body.

In all other respects, the ARRIFLEX 35 IIBV is identical with the ARRIFLEX 35 IIB which will continue as the mainstay of the line.
